

ABIN GEORGE

✉ abin.george.work@gmail.com —  [Portfolio](#) —  [GitHub](#)

SUMMARY

Computer Engineering student specializing in backend development and AI-powered applications with hands-on experience building voice-based systems and intelligent assistants. Proficient in Python, NLP, and real-time interaction systems with a growing passion for creating intuitive digital experiences. Proven hackathon winner with demonstrated ability to deliver innovative solutions under pressure.

EDUCATION

B.Tech in Computer Engineering <i>LBS College of Engineering, Kasaragod</i>	2023 – Present
Diploma in Computer Engineering <i>Government Polytechnic College, Mananthavady</i>	2020 – 2023

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, C++, Java, C, Dart
- **Frameworks & Libraries:** Django, Flutter, REST APIs
- **AI/ML:** Natural Language Processing (NLP), Speech Recognition, Intent Classification, Machine Learning
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, IBM Watson Studio, Figma
- **Core Competencies:** Object-Oriented Programming, DBMS, Data Structures & Algorithms, UI/UX Design

PROFESSIONAL EXPERIENCE

Flutter Developer Intern <i>Soften Technologies, Kochi</i>	June 2024
--	-----------

- Developed cross-platform mobile applications using Flutter and Dart with focus on performance optimization
- Enhanced UI responsiveness and improved overall user experience across Android and iOS platforms
- Integrated RESTful APIs and implemented backend connectivity for real-time data synchronization

Artificial Intelligence & Python Intern <i>PACELAB & E-Cell, IIT Bombay</i>	July 2024
---	-----------

- Implemented machine learning models and executed NLP-based tasks for real-world applications
- Performed data preprocessing, feature engineering, and model training to optimize prediction accuracy

PROJECTS

CampusFlow-AI	<i>Flutter, AI Integration</i>
----------------------	--------------------------------

- Engineered an AI-enabled mobile campus assistance application with intelligent query handling
- Designed intuitive user flows for seamless navigation and real-time access to campus information
- Implemented responsive UI components ensuring optimal performance across devices

Malayalam Voice Assistant	<i>Python, NLP, Speech Recognition</i>
----------------------------------	--

- Developed a bilingual (Malayalam + English) voice assistant for college-related queries using NLP
- Implemented speech recognition pipeline and intent classification system for accurate response generation

- Designed structured FAQ database enabling context-aware responses with 85%+ accuracy

Virtual Assistant System

Python, Machine Learning, NLP

- Built an intent classification model using supervised learning for conversational AI
- Designed dynamic conversational flows handling real-time user queries with multi-turn dialogue support
- Integrated speech-to-text functionality for enhanced user interaction and accessibility

Diabetes Prediction Model

Python, IBM Watson Studio, ML

- Developed a predictive model using Extra Trees Classifier for early non-invasive diabetes detection
- Achieved significant prediction accuracy through feature selection and hyperparameter tuning
- Deployed scalable solution on IBM Cloud platform for healthcare accessibility

MediBridge

Flutter (Dart)

- Created healthcare application improving accessibility to medical services and information
- Designed user-centric interaction flows with emphasis on simplicity and navigation efficiency

ACHIEVEMENTS & RECOGNITION

- **1st Place** – CIPHERTHON 2.0, 6-hour Inter-College Hackathon — CIPHER 2026
- **1st Place** – MediHack Hackathon — Teranis'24, IEEE CS SBC LBSCEK
- **3rd Place** – TeraForge, 24-hour Hackathon — Teranis 2K26

LEADERSHIP & EXTRACURRICULAR

- Conducted AI workshops with live demonstrations, simplifying complex concepts for student audiences
- Active participant in technical symposiums, hackathons, and college basketball team

CERTIFICATIONS

- Cloud Computing – NPTEL (2024)
- AI Agent Architect – IBM SkillsBuild
- AI, Data Science & NLP – Infosys Springboard
- Python Programming & Web Security – DevTown
- Git & GitHub Bootcamp – LetsUpgrade
- Project Management Foundations – LinkedIn Learning
